

Copyright and reusing your own work

1. Introduction

For over two hundred years, Taylor & Francis has achieved global, timely dissemination of new and innovative peer-reviewed research knowledge through article publication in our journals.

We work to assure the integrity of the scholarly record and to protect copyright and associated author rights.

Taylor & Francis, and the scholarly and professional associations with whom we are partners, are committed to the stewardship of the scholarly record, and to managing your intellectual property rights (IPR) as these are associated with your article. Your articles may be the primary written report of the results of a scientific research project, supported by funding from Government or commercial sources. This research may be conducted by you alone; or by a research group within a single institution; or via collaboration between research groups internationally. Your research, in its written article form, has been submitted for consideration to a Taylor & Francis journal, and has been subject to rigorous peer review, and authorial revision. Your article in its accepted form will now be published in its final, definitive, and citable form, for the first time, as the Version of Scholarly Record by Taylor & Francis, or by Taylor & Francis on behalf of a scholarly or professional association.

In addition to facilitating peer review, we add value to your accepted manuscript and create the Version of Scholarly Record by editing the manuscript to a style consistent with community and journal conventions, converting it to a suitable digital form, incorporating digital reference links and metadata tags for feeds to abstracting and indexing services, registering the digital object identifier (DOI), and monitoring electronic usage and citation.

2. Our commitment to you

We agree:

- 2.1.to defend your article against plagiarism and copyright infringement, and to that end, to take all reasonable steps to act against unauthorized replication of your article in part or in whole;
- 2.2.to receive and to administer permissions and deal with licensing issues relating to your article;
- 2.3.to maintain the integrity of your article as the Version of Scholarly Record, “the sworn statement of science”, a definitive, citable, permanent, and secure record of an article, accessible in perpetuity;
- 2.4.to ensure that the published version of your article carries an appropriate level of metadata tagging to facilitate discovery and logging by search engines;
- 2.5.to ensure the safe archiving of your article and as required to ensure that a copy is deposited in any national archive deriving from the Legal Deposit Libraries Act 2003;
- 2.6.to advise you on how to cite your article in both print and online formats;
- 2.7.to enable you to share your article with colleagues via our eprint service;
- 2.8.to deposit your article on your behalf into any repository with which we have an agreement, for example, PubMed or the World Bank.

3. Copyright

We recommend that authors assign copyright in journal articles to Taylor & Francis or the journal proprietor (such as a learned society on whose behalf we publish). Our belief is that the assignment of copyright in an article by

the author to us or to the proprietor of a journal on whose behalf we publish remains the best course of action for proprietor and author alike, as assignment allows Taylor & Francis, without ambiguity, to assure the integrity of the Version of Scholarly Record, founded on rigorous and independent peer review. Moreover, given a journal is a single copyright entity composed of multiple contributions, assignment allows us to properly manage both an author's and proprietor's intellectual property rights (IPR) associated with the article, and to act on an author's and proprietor's behalf when resolving allegations of plagiarism, abuse of moral rights, or infringements of copyright. Assignment also eliminates confusion over copyright in multiple-author articles, and facilitates our ability to negotiate subsidiary licenses with and administer permissions and reuse requests from third parties. Most importantly, we believe assignment enhances the reputation and prestige of the journal, its proprietor, its editors and editorial board, its peer review processes, and the added value we bring. You will be sent the assignment automatically, via our Central Article Tracking System (CATS), in the form of your Author Publishing Agreement.

For the avoidance of doubt, any patent rights, trademark rights, or rights to any process, product, or procedure described in an article are not assigned or licensed by you to us by virtue of the Author Publishing Agreement.

3.1 Moral rights

Similarly, you expressly reserve and assert your right to be identified as the Author of the Article, such right arising under section 77 of the Copyright, Designs and Patents Act 1988, and all your other moral rights arising under the Act and, so far as is legally possible, any broadly equivalent rights you may have in any territory of the world.
