Inclusion through learning: What do we mean by inclusive pedagogies?

Richard Rose and Mary Doveston
University of Northampton, UK
What do we hope to achieve during these sessions?

- An understanding of our responsibilities towards the inclusion of learners with special educational needs.
- An appreciation of the meaning of inclusive education
- A recognition of approaches and strategies that can enable inclusion to take place in schools
- A practical consideration of the implications of teaching for inclusion in schools in India

Transforming lives, inspiring change
How do we intend to work during these sessions?

Learning is a shared responsibility, we will all work together.

Learning is an active, not a passive activity – be prepared to participate if you want to learn.

The key to being an inclusive teacher rests with each individual – beware of “experts” bringing gifts!
In order to understand inclusion we need to consider exclusion

Children have been excluded from schools as a result of many factors:
These include: poverty, gender, disability, religion, caste, social class

Transforming lives, inspiring change
Inclusion an International Agenda

THE SALAMANCA STATEMENT AND FRAMEWORK FOR ACTION ON SPECIAL NEEDS EDUCATION

UN Convention on the Rights of the Child
In Child Friendly Language

The United Nations Convention on the Rights of People with Disabilities
What does it mean for you?

Right of Children to Free and Compulsory Education Act-India

Date commenced
1 April 2010
Summary
Provides for free and compulsory education to all children of the age of six to fourteen years

EDUCATION

CURRICULUM

SOCIABILITY

ATTITUDES

Transforming lives, inspiring change
Transforming lives, inspiring change
Satish is an immature 7 year old. He has learning difficulties including problems with reading (reading age 5.1) and basic numeracy. He likes practical activities including art and making music. Satish has very few friends and has some difficulties relating to other children of his own age, preferring the company of younger children.

Satish’s mother is very anxious about his difficulties and is unsure how best to help him at home.
The responsibilities of the inclusive school to Satish

**SCHOOL**
A well differentiated and balanced curriculum that recognises his individual needs within the whole school context

**FAMILY**
Effective communication and practical ideas of support for Satish that can be realistically delivered at home

**FRIENDS**
Practical strategies for encouraging friendships and promoting peer support

**COMMUNITY**
The promotion of positive attitudes towards Satish. Helping Satish to recognise the contribution that he can make to this community.

**INTERDEPENDENT ASPECTS OF INCLUSION**
Transforming lives, inspiring change
Satish’s learning needs

**CURRICULUM**

A celebration of his abilities and specific interventions for his needs. Individual plans for reading and numeracy

**SOCIABILITY**

Interventions that promote friendships. A focus upon self-esteem. To be taught the skills of interaction

**ATTITUDES**

To have his individuality respected by adults. To have his abilities emphasised to his peers

Failure to address any one of the three components above will impact upon Satish’s ability as a learner

Transforming lives, inspiring change
An inclusive curriculum for Satish

ACADEMIC
Promotion of his learning strengths and interests (art & music). Individual plans for reading and numeracy. Well differentiated lessons

DEVELOPMENTAL
Development of age appropriate teaching materials. Provision of peer support and well structured supportive group work

SOCIAL
Introduction of a buddy system. Provision of structured games/play time.

INTERDEPENDENT ASPECTS OF AN INCLUSIVE CURRICULUM
Transforming lives, inspiring change
Who benefits from this inclusive approach to teaching?

• The pupil with difficulties – through a well planned and individualised approach to their learning

• Others in the class – from a teacher who plans and differentiates to meet a range of needs and abilities

• The school as a whole – through a recognition of the ability of teachers within the school to address a range of needs and abilities

• The teacher – through improved pupil attention and behaviour
Activity

Talk to one of your fellow delegates and identify a pupil known to you who has some difficulties in school

Identify for this pupil your priorities for their academic, developmental and social needs – write these down (10 minutes)

Now consider what the school’s responsibilities for this pupil are in terms of ensuring that he is included in school, family, friends and community – write down what actions could be taken to provide support (10 minutes)
